

Claims

We claim:

1) A guide for a power circular saw comprising:

a rail;

said rail has an attachment end and a spacer end;

said attachment end has one or more bosses;

reversibly attached to the workpiece is a saw attachment piece which further comprises a blade part and an attachment part;

said attachment part has one or more holes;

said holes complementarily reversibly receive said bosses on said attachment end;

a spacer is movable affixed as a ninety degree square to said rail;

said spacer is moveably affixed at the position on said rail to provide the desired width of the saw cut.

2) A guide for a power circular saw as in claim one wherein said spacer has a T shape.

3) A guide for a power circular saw as in claim one wherein said spacer an H shape.

4) A guide for a power circular saw as in claim one wherein said saw attachment piece is permanently attached to the circular hand saw.

5) A guide for a power circular saw comprising:

a rail;

said rail has an attachment end and a spacer end;

means of readily reversibly affixing said rail to the saw;

a spacer is movable affixed as a ninety degree square to said rail;.

- 6) A guide for a power circular saw as in claim one wherein said spacer may be adjustably placed at angles other than ninety degree.
